

5 FAH-8 H-330 SOFTWARE

(CT:WEB-7; 03-15-2013)
(Office of Origin: IRM/OPS/SIO)

5 FAH-8 H-331 WEB SERVER SOFTWARE

(CT:WEB-7; 03-15-2013)

Configuration standards for both Microsoft Internet Information Server (IIS) and Apache are available *from the Bureau of Diplomatic Security's Enterprise Security Services—the DS/SI/ESS Web site.*

5 FAH-8 H-332 WEB DEVELOPMENT SOFTWARE

(CT:WEB-7; 03-15-2013)

- a. You may need software applications to facilitate the development process. Selection of web development software packages should take the end result into account. If such packages require additional applications on the Department of State servers, *IT Configuration Control Board* (IT CCB) approval is required for the additional applications. If in doubt, see the IT CCB *approved CR lists which include software for each of the major networks or the Enterprise Network Management (IRM/OPS/ENM) Standard Operating Environment for Desktops' (SOE-D) SOE-D approved list.*
- b. Standalone development networks must be configured in accordance with *DS/SI* published parameters. Web development software not on the IT CCB approved list may be used on standalone development networks; however, this practice is not recommended.
- c. Web development software for use by persons with disabilities must meet accessibility standards.

5 FAH-8 H-333 THROUGH H-339 UNASSIGNED
